ABOUT US

In this digital age of virtual reality, the paper remains a trusted medium for communicating information and stimulating creative ideas. The look, feel and even smell of the paper help to reinforce the retention of key messages and are unmatched for communication. Right from the A4 paper that is mostly use in our offices to packaging boards and countless other uses, the paper is an integral part of daily life.

SPAK, is a leading manufacturer of recycled Kraft papers and boards, established in 2007

by young techno-savvy entrepreneurs with spread of 30,000 sq ft production unit.

SPAK produces a wide spectrum of Recycled papers ranging from Kraft paper, Eco friendly Copier Paper, Eco Friendly Notebooks and Dining Rolls.

We at SPAK offer high quality, on time solutions for all Packaging needs of various industries such as food, medical, machine, component, fertilizer, tea etc.,

PAPER IS AN INTEGRAL PART OF OUR DAILY LIFE.

ON TIME SOLUTIONS
FOR ALL PACKAGING
NEEDS OF VARIOUS
INDUSTRIES

VISION

To become a Global leader in Recycled Kraft papers and packaging industry by adopting new technologies and delivering quality products at competitive prices.

MISSION

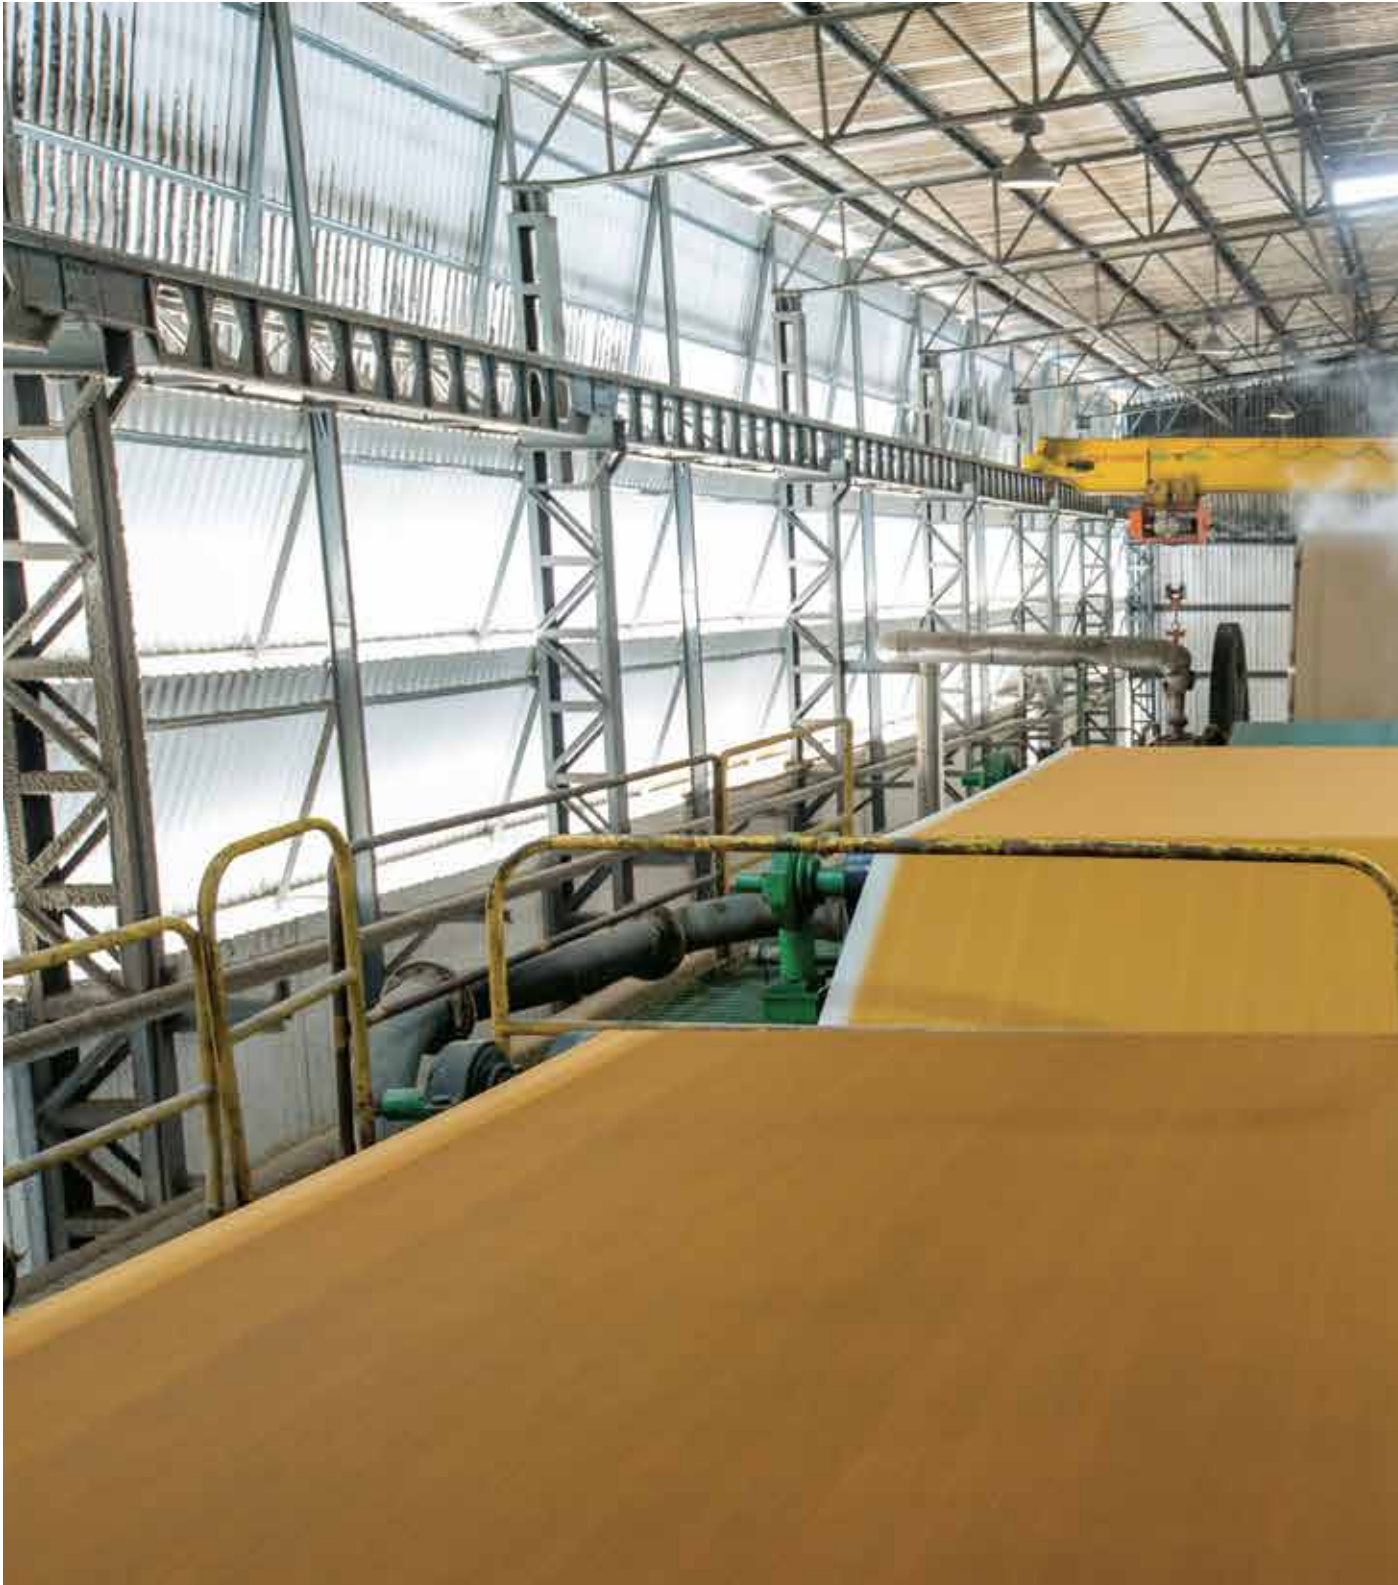

Assured Quality, progressive reduction of the use of natural resources such as raw materials, water, fuel, and power. Effective conservation of resources and building Environment Management System through Re-use and Recycle.

WE ARE ONE OF THE PARTNERS WITH THE PRESTIGIOUS WIND MILL UNITS.

QUALITY POLICY

Ensured that our operations comply with all relevant environment legislation and regulation requirements and other ethical requirements and endeavored to exceed minimum requirements where appropriate.

To minimize the use of non-biodegradable substances. Upgrade process controls and

operating practice to contain and counter pollutants.

Ensured retention of the ISO 14001 standard by defining environmental improvements and setting targets within our ongoing operational management.

ENVIRONMENT POLICY

We take environmental issues seriously; sourcing products from reputable and responsible suppliers resulting in high quality products with enviable environmental credentials. We believe in a responsible approach to environmental, social and ethical issues that may result from our commercial operations. We are, therefore, committed to integrating environmental management into our entire range of business activities.

We use Wind Power in addition to the power derived from TANGEDCO, we are one of the partners with the prestigious wind mill units.

We spread eco-awareness amongst members, affiliates including customers and suppliers and the community at large.

INFRASTRUCTURE

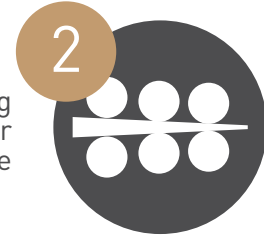

Situated at SIPCOT Industrial Growth Centre, Perundurai, in Coimbatore Highway, SPAK is well connected to all major industrial areas. We have a production capacity of 80 tons per day. A sophisticated infrastructure equipped with upgraded and modern operational techniques ensure ensures high quality. Our facility functions as a specialized unit with different departments of talented professionals.

The Manufacturing Process is based on the recycling of Waste Corrugated Boxes both imported and domestic. The waste papers of different qualities will be used as raw material to produce Kraft paper and board.

It involves a three stages of process:

Pulping & Stock preparation

Sheet Forming process on paper machine

Finishing the paper into reels

MANAGEMENT TEAM
